Manually Set PO

Important – If Ultriva is integrated with the ERP system, check with your Ultriva Administrator to make sure that manually setting a P.O. will not create integration failures.

To navigate to "Set P.O.", click on "Admin".

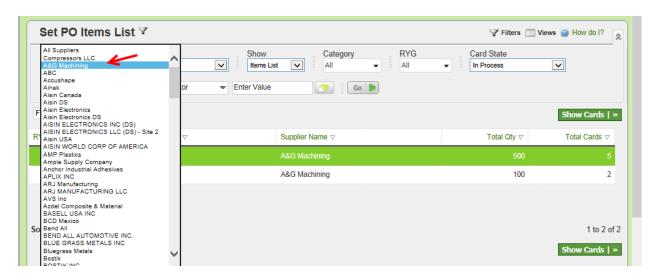

Click on "Set P.O."

Click on the "Change Filter" button.

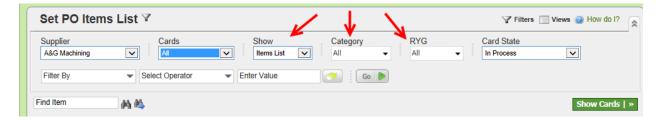

Click on the drop down arrow in the "Supplier" field and select the "Supplier".

Click on the drop down arrow in the "Cards" field and make a selection.

If applicable: Select a Show, Category or RYG selection

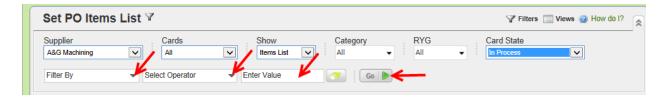

Click on the drop down arrow in the "Card State" field and make a selection.

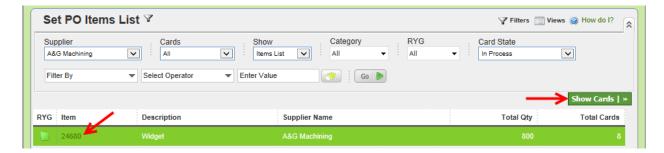

Quick Tip – To define the filter even further, click on the "Filter By, Selecting Operator and Enter Value" selections

Click on the "Go" button

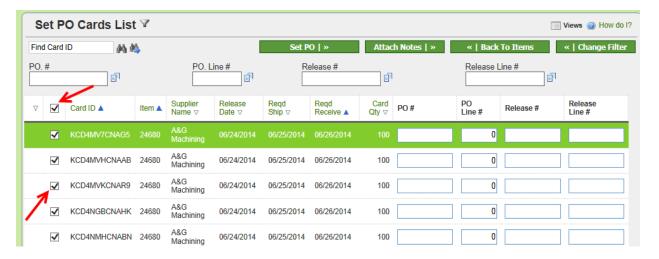

Important – If for some reason the output does not match what you are looking for, recheck the input in the filter and make the necessary changes. Remember to click on the "Go" button for the changes to take effect.

Click on the part number to advance to the "Set PO Cards" list, or click on a line item and the line will highlight. If the line was highlighted, click on the "Show Cards" button.

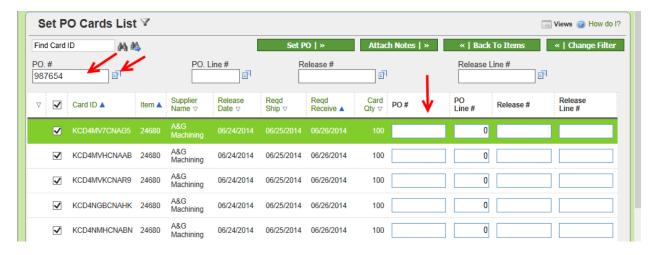

The filter selections appear. Click in the selection box at the column heading to select all cards or select the cards individually. A checkmark will appear.

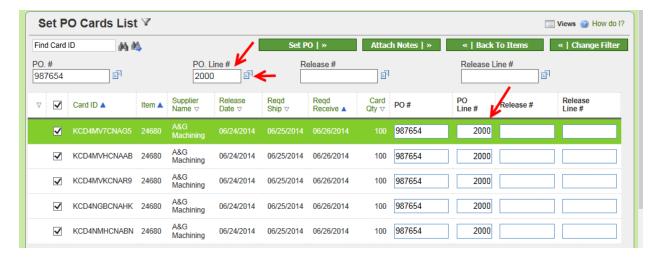

Tool Tip – The "Apply to All" icons are located on all "Action" screens where repeated data is entered. Data such as "P.O. Number and P.O. Line number" is where this tool comes in real handy.

Click in the P.O. # field and type in the "P.O. Number". Click on the "Apply to All" icon.

P.O. information can also be entered individually under each column.

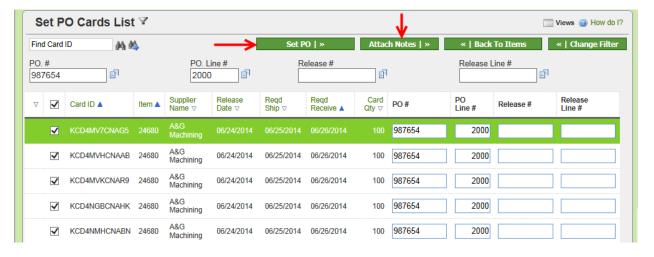

The P.O. numbers have been entered. **Repeat** the **steps** to **add** the "**P.O. Line Number**". (If applicable) *Add the "Release #" and "Release Line #"*

 \sqrt{Q} Quick Tip – Notes can be added at this time by clicking on the "Attach Notes" button.

Click on the "Set P.O." button.

The "P.O. Set Successfully"
