Report filter ..... 13
- 1.13 Receipts Dashboard should open on a new tab ..... 14
- 1.14 Create EboJobOracleCloseProduction..... 15

# Ultriva 9.1 Release Notes

## 1 Enhancements

### 1.1 Added LotInfo and CertInfo to ItemSync

**LotInfo** can have values: **N** - none, **S** - required at ship, **R** - required on receive. For any other value, the LotInfo will be set to N.

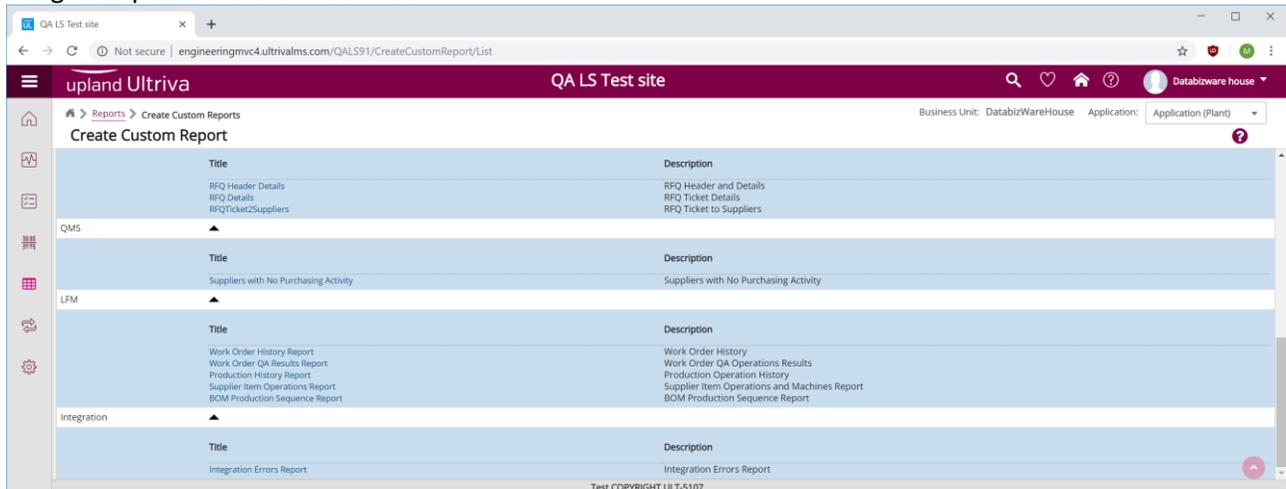

**CertInfo** can have values: **N** - none, **S** - required at ship, **A** - approval required. For any other value, the CertInfo will be set to N.

### 1.2 OEE Data Load Enhancement

OEE Data Load enhancement: cleanup before upload. New operations/machines will be added if not in the system. Only operations/machines in the file will be assigned to Supplier Item. **All previously established relationships will be removed.**

### 1.3 New Custom Report-Supplier Item Operations Report Added

Supplier Item operations/machines report custom report added in LFM. Report shows Supplier Items and assigned operations and machines.

### 1.4 Added Filters to Batch Job Report

In Batch Job Report Summary, added footer with totals for Pending, Completed, Failed and DataError. Footer totals are calculated through the whole dataset, not related to paging.

# Ultriva 9.1 Release Notes

For records in status Data Error several can be downloaded in one file, file name will be the first Batch GID in the group:

The screenshot shows the 'Batch Job Supplier Sync Error Detail Report' in the Ultriva QA LS Test site. The interface includes a navigation menu, search bar, and filters. The main content is a table of error records. The table is sorted by Batch ID and Line #. A 'Download' button is visible above the table.

| Line # | Severity | StatusCode | StatusMsg                                      | LineData  | Batch ID             |

## Ultriva 9.1 Release Notes

### 1.5 Added Supplier Item Number to Kanban Custom Reports

Supplier Item No. added to reports: Active Cards, Cross Tab History, History, Action Audit, Consignment Inventory Cost Report, Cycle History.

### 1.6 Added By Lot option to integration point JobExpPutAway

The based integration from Ultriva to ERP for PutAway now can be sent with lot information. Set in JobFileParams new parameter bylot = 1

Add to fields: VendorLotNo, VendorLotQty, VendorLotNotes

For items with flag Wait for Put Away, if item was shipped/received with lot info those fields will get populated in output file.

For items without lot info VendorLotQty will have ReceiveQty

### 1.7 Edit Expiry Date on Cards

New Action for Buyer added: Set Expiry Date. Filter shows list of items with cards with valid (not empty) Expiry Date. User can change Expiry Date: set it to empty (card will never expire and will not show on the list again) or set it to valid date for today or future (not holiday date) based on BU.

The screenshot displays the 'Set Expiry Date Cards List' interface in the Ultriva system. The page header shows 'upland Ultriva' and 'QA LS Test site'. The breadcrumb navigation is 'Actions > Set Expiry Date'. The Business Unit is 'TCEK-Ram' and the Application is 'Applicatic'. The page title is 'Set Expiry Date Cards List'. There are buttons for 'Set Expiry Date', 'Attach Notes', and 'Back To Items'. A search bar for 'Expiry Date' is present. The table is sorted by 'Item, Card ID'. The table has the following columns: Card ID, Item, Cycle No, Card Qty, Location Code, and Expiry Date. The data row is: KCDGZYHTRAR7, IT020419, 0, 65, test56, 04/03/2019. There are also buttons for 'Set Expiry Date', 'Attach Notes', and 'Back To Items' at the bottom of the table.

| Card ID      | Item     | Cycle No | Card Qty | Location Code | Expiry Date |
|--------------|----------|----------|----------|---------------|-------------|
| KCDGZYHTRAR7 | IT020419 | 0        | 65       | test56        | 04/03/2019  |

# Ultriva 9.1 Release Notes

## 1.8 Added Notes on the Replace Item Page.

All cards in cycle on the effective date for the replacement item # and/or revision will complete that cycle with the current item # and/or revision.

All cards released on and/or after the effective date will reflect the updated item # and/or revision.

## 1.10 Change Share Project Component in IOT and Display Users

IOT Application now allows to Share project with single users, also now IOT saves project information in database instead of files on server.

After project is shared with users, those users will see shared projects in the My Shared Projects section.

## 1.11 Highlight Rows with Missing Attachments

Attachment icon added to Ship Cards screen indicating which cards are missing required attachments. This icon will be visible after Ship button is pressed

Show Report Schedule Report

# Ultriva 9.1 Release Notes

The screenshot shows the 'Production History' report configuration interface. At the top, the 'upland Ultriva' logo is on the left and 'QA LS Test site' is on the right. Below the logo is a breadcrumb trail: Home > Reports > Closed Production Report > Production History Report. The main title 'Production History' is centered. The configuration area includes:
 

- Show Report for:** Radio buttons for 'My Business Unit' (selected) and 'My Supplier Business Unit'. A dropdown menu shows 'dkwork2'.
- Date range:** A text input field containing '04/01/2018-03/31/2019'.
- Operation Status:** A dropdown menu set to 'All'.
- Supplier Item No:** A text input field with a pink button labeled 'All Supplier Items x'.
- Two buttons at the bottom right: 'Show Report' and 'Schedule Report'.

## 1.13 Open Receipts Dashboard on a New Tab

Receipts Dashboard Report will now open in a new tab.

The screenshot shows the 'Receipts Dashboard' report in a browser window. The browser tabs show 'QA LS Test site' and the address bar contains 'engineeringmv4.ultrivalms.com/QALS92/ReceiptDashboard/Home'. The dashboard header includes the 'upland Ultriva' logo, the title 'Receipts Dashboard', and the date 'Tue Apr 09 2019'. The main content is divided into two sections:
 

- Summary:** A vertical stack of four orange cards showing:
  - 3 Receipts Due
  - 0 Received
  - 0 Past Due Receipts Due
  - 0 Received
  - 0 Today Receipts Due
  - 0 Tomorrow Receipts Due
- Item Receipt Details:** A table with columns for Item, Supplier Name, Cards Due, Quantity Due, Cards Received, and Quantity Received. The table contains two rows of data for items BOM050216 and ITN050216, both supplied by DrillCell.

| RYG | Item      | Supplier Name | Cards Due |           | Quantity Due |           | Cards Received |           |        | Quantity Received |           |        |   |
|-----|-----------|---------------|-----------|-----------|--------------|-----------|----------------|-----------|--------|-------------------|-----------|--------|---|
|     |           |               | Past Due  | Due Today | Past Due     | Due Today | Past Due       | Due Today | Future | Past Due          | Due Today | Future |   |
|     | BOM050216 | DrillCell     | 2         | 0         | 50           | 0         | 0              | 0         | 0      | 0                 | 0         | 0      | 0 |
|     | ITN050216 | DrillCell     | 1         | 0         | 45           | 0         | 0              | 0         | 0      | 0                 | 0         | 0      | 0 |

### *1.14 Oracle Connector - EboJobOracleCloseProduction*

---

Created new integration point with Oracle Connector - EboJobOracleCloseProduction which sends the closed order data to Oracle.
